

B+D Readers

Test your eyes

- 1 Print this test on an A4 size paper.
- 2 Stand about 40 cm away from the tester unit.
- 3 Read the text from the top without glasses until you start having difficulty reading.
- 4 Look to the right side to confirm your corresponding diopter.
- 5 Try the different focus powers and select the diopter that assist you in reading more clearly.

Presbyopia is part of a natural aging process **+3.50**
of the eye, affecting men and women equally, and is **+3.00**
characterized by an inability to focus sharply on close objects. **+2.50**
It becomes evident when performing near work, such as reading, sewing or **+2.00**
handwriting. People with presbyopia may develop blurred near vision, eye strain, or feel **+1.50**
fatigued, B+D Readers are the perfect solution to prebyopia related symptoms. It is advisable to check your vision with an ophthalmologist. **+1.00**
